Lignin-degrading peroxidases from genome of selective ligninolytic fungus *Ceriporiopsis subvermispora*.

Elena Fernández-Fueyo, Francisco J. Ruiz-Dueñas, Yuta Miki,
María Jesús Martínez, Kenneth E. Hammel, and Angel T. Martínez

PAGE 16909:

The authors have become aware that they neglected to include a footnote explaining that some of the data presented, required for comparison with the new data shown in Table 1, had already been published in one of their previous papers. The authors apologize for the oversight; the following footnote should be added to Table 1: “^{cf} The VA, RB5, and Mn²⁺ constants of 99382, 118677, 117436, LiP, and VP in Table 1 are from Ref. 71.”

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
